

Ductility Of Bituminous Materials Test

BB 508

ASTM D.113 / AASHTO T.51

BB 508.1

Ductility Of Bituminous Materials Test

Asphalt

Ductility is a measure of the cohesive strength of a binder. The method can be used as part of a series of classification tests to determine binder properties.

Type	Parts Name	Specification	Qty
BB 508.1	Ductility mold	From sample shape and hold end during test made of brass, provided with base	1 Set
BB 508.2	Ductility machine	Electric 220V-AC stainless steel bath, provided with temperature control, pulling speed 5 mm/min, travel range 150 cm	1 Set

Supplied without :

- BG.067/2 Glycerin
- BG.068/1 Talk
- BG.047/1 Spatulla
- BG.034/2 Thermometer 0-100 C
- BG.016/4 Mixing Bowl
- BG.049/1 Spoon
- BG.011/1 Hot Plate
- BG.045/2 Leather Glove
